leftover Question (8-10) min

~~+~~

Prism

(55-60) min

→ (Pyramid + Tetrahedron) → extra class

10. Base of a right prism is a rectangle with different integral (in cm) length and breadth. If the volume of the prism is numerically equal to the lateral surface area, which of the following can be the breadth of the rectangle?

(a) 2 cm

(b) 3 cm

(c) 4 cm

(d) 5 cm

**Ans. (b)**

Right

# Prism

Base | Top → Polygon  
lateral surface → Rectangle

Base Triangle

Base / Top  $\rightarrow$  Rectangle  
Lateral Surface  $\rightarrow$  Rectangle

Base  $\rightarrow$  Hexagon

# What is Prism ?

Base | Top  $\rightarrow$  Polygons

Lateral surfaces  $\rightarrow$  Rectangle

Name of Prism  $\longrightarrow$  Base

Base

Triangle

Rectangle

Hexagon

Name

Triangular Prism

Rectangular Prism

Hexagonal Prism

# Is Right Circular Cylinder a Prism?

No

B/c

Base/Top are  
not polygon

# Faces, Vertices and Edges of Prism

Faces  $\rightarrow$  5

vertices  $\rightarrow$  6

Edges  $\rightarrow$  9

$$F + V - E = 2$$

Faces  $\rightarrow$  6

Vertices  $\rightarrow$  8

Edges  $\rightarrow$  12

For Any Prism where Base  
is a Polygon of  $n$  sides

Faces  $\rightarrow n + 2$

Vertices  $\rightarrow 2n$

Edges  $\rightarrow 3n$

$$n = 5$$

eg There's a pentagonal prism

Find the value  $F + E - V$

$F \rightarrow$  Faces (7)

$E \rightarrow$  Edges (15)

$V \rightarrow$  Vertices (10)

$$7 + 15 - 10$$

$$= \underline{\underline{12}}$$

# LSA of Prism

let the side of the  
base are  $a, b$  &  $c$  &  
height of prism is  
 $h$

$$\rightarrow ah + bh + ch$$

$$\rightarrow h(a + b + c)$$

$\rightarrow$  perimeter of base  $\times$  height

# Formulae used in Prism

(i) Lateral surface area = Perimeter of the base  $\times$  Height

(ii) Total surface area = Lateral surface area +  $2 \times$  area of the base

(iii) Volume = Area of the base  $\times$  Height

1. The base of a right prism is an equilateral triangle. If the lateral surface area and the volume are  $120 \text{ cm}^2$  and  $40\sqrt{3} \text{ cm}^3$  respectively, then the side of base of the prism is:

- (a) 4 cm  
(c) 7 cm

- (b) 5 cm  
(d) 40 cm

Eq  $\Delta$

$$LSA = 120$$

$$\text{Volume} = 40\sqrt{3}$$

$$(\text{Perimeter of base}) \times \text{height} = 120$$

$$(\text{Area of base}) \times \text{height} = 40\sqrt{3}$$

$$3s \cdot h = 120 \quad \text{--- (1)}$$

$$\frac{\sqrt{3}}{4} s^2 \cdot h = 40\sqrt{3} \quad \text{--- (2)}$$

$$\frac{\sqrt{3}s}{4 \cdot \cancel{2h}} = \frac{1}{\sqrt{3}}$$

$$\boxed{s = 4}$$

**Ans. (a)**

2. The base of a right prism is a right-angled triangle whose sides are 5 cm, 12 cm and 13 cm. If the area of the total surface of the prism is  $360 \text{ cm}^2$ , then its height (in cm) is

(a) 10

(b) 12

(c) 9

(d) 11

Base

$$TSA = 360 \text{ cm}^2$$

$$h = ??$$

$$TSA = LSA + 2(\text{Area of Base})$$

$$(5 + 12 + 13)h + 2 \times \frac{1}{2} \cdot 5 \cdot 12 = 360$$

$$30h = 300$$

$$h = 10$$

**Ans. (a)**

3. The total surface area of a right triangular prism of height 6 cm is  $162\sqrt{3} \text{ cm}^2$ . If the base of the prism is an equilateral triangle, what is the volume of the prism?

(a)  $162\sqrt{3} \text{ cm}^3$

(b)  $105\sqrt{3} \text{ cm}^3$

(c)  $201\sqrt{3} \text{ cm}^3$

(d)  $243 \text{ cm}^3$

Eq Triangle

$$TSA = 162\sqrt{3}$$

$$h = 6 \text{ cm}$$

$$\text{Volume} = \frac{1}{3} \times \text{Base Area} \times \text{Height}$$

$$3S \cdot 6 + 2 \cdot \frac{\sqrt{3}}{4} S^2 = 162\sqrt{3}$$

$$\sqrt{3}S^2 + 36S - 324\sqrt{3} = 0$$

$$S^2 + 12\sqrt{3}S - 324 = 0$$

$$S = -18\sqrt{3} \text{ or } \underline{6\sqrt{3}}$$

$$\frac{\sqrt{3}}{4} \cdot 6\sqrt{3} \cdot 6\sqrt{3} \cdot 6 = 162\sqrt{3} \text{ cm}^3$$

**Ans. (a)**

4. A prism has as the base a right angled triangle whose sides adjacent to the right angles are 10 cm and 12 cm long. The height of the prism is 20 cm. The density of the material of the prism is 6 gm/cubic cm. The weight of the prism is \_\_\_\_\_

- (a) 6.4 kg      (b) 7.2 kg  
(c) 3.4 kg      (d) 4.8 kg

Right angle  $\triangle$

$$\text{Volume} = (\text{Area})(\text{height})$$

$$\frac{1}{2} \times 12 \times 10 \times 20$$

$$1200 \text{ cm}^3 \times 6 \text{ gm/cm}^3$$

$$7200 \text{ gm}$$

$$7.2 \text{ Kg}$$

**Ans. (b)**

5. The perimeter of the triangular base of a right prism is 15 cm and the radius of the incircle of the triangular base is 3 cm. If the volume of the prism be  $270 \text{ cm}^3$ , then the height of the prism is:

- (a) 6 cm  
(c) 10 cm

- (b) 7.5 cm  
(d) 12 cm

$$r = 3 \text{ cm}$$

$$p = 15 \text{ cm}$$

$$\text{Volume} = 270$$

$$h = ?$$

$$\text{Volume of prism} = (\text{Area})(\text{height})$$

$$\Rightarrow (r \cdot s) \cdot h$$

$$3 \cdot \frac{15}{2} \cdot h = 270$$

$$\underline{h = 12 \text{ cm}}$$

**Ans. (d)**

6. The base of a right prism is a rectangle, the ratio of whose length and breadth is 3:2. If the height of the prism be 12 cm and the total surface area is 288 sq. cm, the volume of the prism is:

- (a) 291 cm<sup>3</sup>                      ~~(b) 288 cm<sup>3</sup>~~  
(c) 290 cm<sup>3</sup>                      (d) 286 cm<sup>3</sup>

$$TSA = 288$$

$$p \cdot h + 2A = 288$$

$$2(3x+2x) \cdot 12 + 2 \cdot (6x^2) = 288$$

$$x^2 + 10x - 24 = 0$$

$$x = -12, \quad \textcircled{2}$$

$$= \textcircled{288}$$

2x

3x

$$l = 6 \quad b = 4$$

$$\text{Volume} = 6 \cdot 4 \cdot 12$$

**Ans. (b)**

- (a) 910 cm<sup>3</sup>                      (b) 920 cm<sup>3</sup>  
(c) 960 cm<sup>3</sup>                      (d) 980 cm<sup>3</sup>

$$h = 15 \text{ cm}$$

Base  $\rightarrow$  Square

$$T_{SA} = 608$$

Volume =  $\pi r^2 h$

$$p \cdot h + 2(A) = 608$$

$$4s \cdot 15 + 2s^2 = 608$$

$$s^2 + 30s - 304 = 0$$

$$\Delta = -38, \textcircled{8}$$

$$\text{Volume} = 8^2 \cdot 15 = \underline{960 \text{ cm}^3}$$

**Ans. (c)**

8. The lateral surface area is  $8\sqrt{3} \text{ cm}^2$  more than the area of the base of a prism, whose base is an equilateral triangle. If the height of the prism is  $\sqrt{3} \text{ cm}$ , then the volume of the prism is

(a)  $12 \text{ cm}^3$

(b)  $18 \text{ cm}^3$

(c)  $48 \text{ cm}^3$

(d) Either (a) or (c)

Base  $\rightarrow$  eq  $\Delta$

$$\text{LSA} = \text{Area} + 8\sqrt{3}$$

$$h = \sqrt{3}$$

$$\text{Volume} = ???$$

$$3S \cdot \sqrt{3} = \frac{\sqrt{3}}{4} S^2 + 8\sqrt{3}$$

$$12S = S^2 + 32$$

$$S^2 - 12S + 32 = 0$$

$$S = 4, 8$$

$$V = (\text{Area}) \times \text{height} \\ \frac{\sqrt{3}}{4} \cdot 4^2 \cdot \sqrt{3} \Rightarrow (12)$$

**Ans. (d)**

9. The base of a right prism is a quadrilateral ABCD. Given that  $AB = 9$  cm,  $BC = 14$  cm,  $CD = 13$  cm,  $DA = 12$  cm and  $\angle DAB = 90^\circ$ . If the volume of the prism be  $2070 \text{ cm}^3$ , then the area of the lateral surface is –

- (a)  $720 \text{ cm}^2$  (b)  $810 \text{ cm}^2$   
(c)  $1260 \text{ cm}^2$  (d)  $2070 \text{ cm}^2$

$$\text{Volume} = 2070$$

$$\text{LSA} = (12 + 9 + 14 + 13) \cdot 15$$

$$A \cdot h = 2070$$

Area of Quad ABCD

$$= \text{Area of } \triangle ABD + \triangle BCD$$

$$\frac{1}{2} \cdot 9 \cdot 12 + \frac{1}{2} \cdot \sqrt{21 \cdot 8 \cdot 7 \cdot 6}$$

$$54 + 84 = 138 \text{ cm}^2$$

$$138 \cdot h = 2070$$

$$h = 15 \text{ cm}$$

**Ans. (a)**

10. Base of a right prism is a rectangle with different integral (in cm) length and breadth. If the volume of the prism is numerically equal to the lateral surface area, which of the following can be the breadth of the rectangle?

(a) 2 cm

(c) 4 cm

~~(b) 3 cm~~

~~(d) 5 cm~~

$$l \neq b$$

$$b-2=1$$

$$b=3$$

$$(lb) \cancel{=} 2(l+b) \cancel{=}$$

$$lb - 2l - 2b = 0$$

$$l(b-2) - 2(b-2) = 4$$

$$(l-2)(b-2) = 4$$

$$\boxed{4 \cdot 1}$$

**Ans. (b)**

# Pyramid

# What is Pyramid ?
